SBOM/SCA Security Scan Report

Software Bill of Materials & Supply Chain Security Analysis

Generated on February 06, 2026 at 10:39 AM

Executive Summary

Metric	Value
Total Vulnerabilities	14
Unique Packages Affected	10
Fixable Vulnerabilities	14
Average Risk Score	N/A

Vulnerabilities by Severity

Severity	Count
HIGH	14

Vulnerabilities by Fix Status

Fix Status	Count
Fix_Available	14

Vulnerability #1: Azure Core deserialization vulnerability

Property	Value
Title	Azure Core deserialization vulnerability
Impact	HIGH
Dependencies	azure-core@1.36.0 (python)
CVE IDs	CVE-2025-21622

Description

Deserialization of untrusted data in azure-core

Suggested Fix

Upgrade to azure-core 1.38.0 or later

Affected Dependencies

• azure-core@1.36.0 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #2: Minerva timing attack on ECDSA (P-256)

Property	Value
Title	Minerva timing attack on ECDSA (P-256)
Impact	HIGH
Dependencies	ecdsa@0.19.1 (python)
CVE IDs	CVE-2025-21622

Description

Minerva timing attack on P-256 in python-ecdsa

Suggested Fix

No fix available yet (not-fixed)

Affected Dependencies

• ecdsa@0.19.1 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #3: Starlette Range header DoS

Property	Value
Title	Starlette Range header DoS
Impact	HIGH
Dependencies	starlette@0.48.0 (python)
CVE IDs	CVE-2025-21622

Description

Starlette vulnerable to O(n^2) DoS via Range header merging in FileResponse

Suggested Fix

Upgrade to starlette>=0.49.1

Affected Dependencies

• starlette@0.48.0 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #4: FastChat Denial of Service (DoS)

Property	Value
Title	FastChat Denial of Service (DoS)
Impact	HIGH
Dependencies	fschat@0.2.36 (python)
CVE IDs	CVE-2025-21622

Description

FastChat Denial of Service vulnerability

Suggested Fix

Not fixed (upgrade not available)

Affected Dependencies

• fschat@0.2.36 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #5: FastChat SSRF vulnerability

Property	Value
Title	FastChat SSRF vulnerability
Impact	HIGH
Dependencies	fschat@0.2.36 (python)
CVE IDs	CVE-2025-21622

Description

FastChat Server-Side Request Forgery vulnerability

Suggested Fix

Not fixed (upgrade not available)

Affected Dependencies

• fschat@0.2.36 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #6: FastChat SSRF vulnerability (2nd entry)

Property	Value
Title	FastChat SSRF vulnerability (2nd entry)
Impact	HIGH
Dependencies	fschat@0.2.36 (python)
CVE IDs	CVE-2025-21622

Description

FastChat Server-Side Request Forgery vulnerability

Suggested Fix

Not fixed (upgrade not available)

Affected Dependencies

• fschat@0.2.36 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #7: FastChat DoS via Resource Consumption

Property	Value
Title	FastChat DoS via Resource Consumption
Impact	HIGH
Dependencies	fschat@0.2.36 (python)
CVE IDs	CVE-2025-21622

Description

FastChat Uncontrolled Resource Consumption vulnerability

Suggested Fix

Not fixed (upgrade not available)

Affected Dependencies

• fschat@0.2.36 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #8: AIOHTTP zip bomb DoS vulnerability

Property	Value
Title	AIOHTTP zip bomb DoS vulnerability
Impact	HIGH
Dependencies	aiohttp@3.13.0 (python); aiohttp@3.13.2 (python)
CVE IDs	CVE-2025-21622

Description

AIOHTTP HTTP Parser auto_decompress feature vulnerable to zip bomb

Suggested Fix

Upgrade to aiohttp 3.13.3 or later

Affected Dependencies

• aiohttp@3.13.0 (python)

• aiohttp@3.13.2 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #9: pyasn1 DoS vulnerability (decoder)

Property	Value
Title	pyasn1 DoS vulnerability (decoder)
Impact	HIGH
Dependencies	pyasn1@0.6.1 (python)
CVE IDs	CVE-2025-21622

Description

pyasn1 DoS vulnerability in decoder

Suggested Fix

Upgrade pyasn1 to 0.6.2 or later

Affected Dependencies

• pyasn1@0.6.1 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #10: urllib3 unbounded decompression chain

Property	Value
Title	urllib3 unbounded decompression chain
Impact	HIGH
Dependencies	urllib3@2.5.0 (python)
CVE IDs	CVE-2025-21622

Description

urllib3 allows an unbounded number of links in the decompression chain

Suggested Fix

Upgrade to urllib3 2.6.0 or later

Affected Dependencies

• urllib3@2.5.0 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #11: urllib3 DoS via streaming data

Property	Value
Title	urllib3 DoS via streaming data
Impact	HIGH
Dependencies	urllib3@2.5.0 (python)
CVE IDs	CVE-2025-21622

Description

urllib3 streaming API improperly handles highly compressed data

Suggested Fix

Upgrade to urllib3 2.6.0 or later

Affected Dependencies

• urllib3@2.5.0 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #12: Python-Multipart Arbitrary File Write

Property	Value
Title	Python-Multipart Arbitrary File Write
Impact	HIGH
Dependencies	python-multipart@0.0.20 (python)
CVE IDs	CVE-2025-21622

Description

Python-Multipart has Arbitrary File Write via Non-Default Configuration

Suggested Fix

Upgrade to python-multipart 0.0.22 or later

Affected Dependencies

• python-multipart@0.0.20 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #13: protobuf JSON recursion depth bypass

Property	Value
Title	protobuf JSON recursion depth bypass
Impact	HIGH
Dependencies	protobuf@6.32.1 (python)
CVE IDs	CVE-2025-21622

Description

protobuf vulnerability with JSON recursion depth bypass

Suggested Fix

Upgrade to protobuf 6.33.5 or later

Affected Dependencies

• protobuf@6.32.1 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a

Vulnerability #14: AIOHTTP header parsing and DoS variants

Property	Value
Title	AIOHTTP header parsing and DoS variants
Impact	HIGH
Dependencies	aiohttp@3.13.0 (python); aiohttp@3.13.2 (python)
CVE IDs	CVE-2025-21622

Description

AIOHTTP vulnerability related to header parsing and potential DoS (various CVEs)

Suggested Fix

Upgrade to patched aiohttp versions (e.g., 3.13.3)

Affected Dependencies

• aiohttp@3.13.0 (python)

• aiohttp@3.13.2 (python)

CVE Details

CVE-2025-21622: ClipBucket V5 provides open source video hosting with PHP. During the user avatar upload workflow, a user can choose to upload and change their avatar at any time. During deletion, ClipBucket checks for the avatar_url as a filepath within the avatars subdirectory. If the URL path exists within the a
