Vulnerability breakdown

Critical **1** High **1** Medium **1** Low **0**

Dependency and bill-of-materials vulnerabilities for this scan. Package impact and remediation guidance are listed below.

How to read: Use the catalog to identify affected packages, then review each detail card for CVE context and upgrade guidance.

Platform: Zero Shield · **zeroshield.ai**

SEVERITY GUIDANCE

Critical: Immediate remediation required — severe exploitability / impact.

High: Remediate in the current cycle — significant risk if left open.

Medium: Schedule remediation — real risk with moderate urgency.

Priority action: 1 Critical · 1 High — remediate these items first. Full findings catalog and evidence follow. More at zeroshield.ai.

Findings Catalog

3 issues

#	SEVERITY	FINDING	LOCATION
1	CRITICAL	Vulnerable dependency: pillow@10.2.0	`pillow@10.2.0`
2	HIGH	Vulnerable dependency: cryptography@41.0.7	`cryptography@41.0.7`
3	MEDIUM	Vulnerable dependency: urllib3@1.26.18	`urllib3@1.26.18`

Detailed Findings

Each card shows affected package(s), description, and remediation. Package and CVE values use monospace.

CRITICAL

#1 Vulnerable dependency: pillow@10.2.0

Severity	Critical
Affected package(s)	`pillow@10.2.0`
CVE IDs	`CVE-2024-28219`

DESCRIPTION

pillow 10.2.0 is affected by a known vulnerability. Upgrade to a fixed release.

REMEDIATION

Upgrade pillow to a patched version (>=10.3.0 recommended).

MAPPINGS

OWASP Top 10	`A06:2021: Vulnerable and Outdated Components`
CVE detail	`CVE-2024-28219: Buffer overflow in pillow image processing`

HIGH

#2 Vulnerable dependency: cryptography@41.0.7

Severity	High
Affected package(s)	`cryptography@41.0.7`
CVE IDs	`CVE-2023-50782`

DESCRIPTION

cryptography 41.0.7 has a known high-severity advisory.

REMEDIATION

Upgrade cryptography to the latest patched release.

MAPPINGS

CVE detail	`CVE-2023-50782: PKCS#12 timing side-channel`

MEDIUM

#3 Vulnerable dependency: urllib3@1.26.18

Severity	Medium
Affected package(s)	`urllib3@1.26.18`
CVE IDs	`CVE-2024-37891`

DESCRIPTION

urllib3 1.26.18 is affected by a medium-severity issue.

REMEDIATION

Upgrade urllib3 to a fixed 1.26.x or 2.x release.

MAPPINGS

CVE detail	`CVE-2024-37891: Proxy-authorization header leakage`
