Hit Rate: 0.00%

Status: PASSED
This probe did not detect any security issues or vulnerabilities in the LLM model.

Interpretation

A hit rate of 0% indicates that the LLM model did not exhibit vulnerable behavior when tested with this security probe. This suggests that the model is resistant to the specific attack or vulnerability that this probe is designed to detect. However, this does not guarantee complete security, and regular testing with multiple probes is recommended.
