MCP Security Scan Report

Model Context Protocol Security Analysis

Generated on December 23, 2025 at 12:46 PM

Executive Summary

Metric	Value
Total Issues Found	52
Unique Tools Affected	18
Unique Servers Scanned	2
Scan Errors	1

Issues by Severity

Severity	Count
CRITICAL	3
HIGH	33
LOW	13
UNKNOWN	3

Issues by Issue Code

Issue Code	Count
TF001	26
TF002	23
W005	2
W004	1

Issues by Server

Server	Count
playwright	51
howtocook-mcp	1

Issue #1: W005

Property	Value
Issue Code	W005
Severity	UNKNOWN
Issue Type	Unknown
Server	playwright
Tool Name	browser_run_code
Issue Message	The tool is not in our registry, even though the server is.

Full Issue Message

The tool is not in our registry, even though the server is.

Tool Details

Tool Name: browser_run_code
Description: Run Playwright code snippet
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Unknown
Issue Code: W005
Server: playwright
Severity: UNKNOWN

Issue #2: W005

Property	Value
Issue Code	W005
Severity	UNKNOWN
Issue Type	Unknown
Server	playwright
Tool Name	browser_snapshot
Issue Message	The tool is not in our registry, even though the server is.

Full Issue Message

The tool is not in our registry, even though the server is.

Tool Details

Tool Name: browser_snapshot
Description: Capture accessibility snapshot of the current page, this is better than screenshot
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Unknown
Issue Code: W005
Server: playwright
Severity: UNKNOWN

Issue #3: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_console_messages
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_console_messages
Description: Returns all console messages
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #4: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_evaluate
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_evaluate
Description: Evaluate JavaScript expression on page or element
Input Schema Type: object
Properties: 3 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #5: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_network_requests
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_network_requests
Description: Returns all network requests since loading the page
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #6: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_run_code
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_run_code
Description: Run Playwright code snippet
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #7: TF001

Property	Value
Issue Code	TF001
Severity	LOW
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_take_screenshot
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_take_screenshot
Description: Take a screenshot of the current page. You can't perform actions based on the screenshot, use browser_snapshot for actions.
Input Schema Type: object
Properties: 5 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: LOW

Issue #8: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_snapshot
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_snapshot
Description: Capture accessibility snapshot of the current page, this is better than screenshot
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #9: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_select_option
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_select_option
Description: Select an option in a dropdown
Input Schema Type: object
Properties: 3 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #10: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_tabs
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_tabs
Description: List, create, close, or select a browser tab.
Input Schema Type: object
Properties: 2 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #11: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Private Data Tool
Server	playwright
Tool Name	browser_console_messages
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_console_messages
Description: Returns all console messages
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Private Data Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #12: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Private Data Tool
Server	playwright
Tool Name	browser_evaluate
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_evaluate
Description: Evaluate JavaScript expression on page or element
Input Schema Type: object
Properties: 3 property/properties defined

Issue Type Information

Issue Type: Private Data Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #13: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Private Data Tool
Server	playwright
Tool Name	browser_network_requests
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_network_requests
Description: Returns all network requests since loading the page
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Private Data Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #14: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Private Data Tool
Server	playwright
Tool Name	browser_run_code
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_run_code
Description: Run Playwright code snippet
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Private Data Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #15: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Private Data Tool
Server	playwright
Tool Name	browser_take_screenshot
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_take_screenshot
Description: Take a screenshot of the current page. You can't perform actions based on the screenshot, use browser_snapshot for actions.
Input Schema Type: object
Properties: 5 property/properties defined

Issue Type Information

Issue Type: Private Data Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #16: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Private Data Tool
Server	playwright
Tool Name	browser_snapshot
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_snapshot
Description: Capture accessibility snapshot of the current page, this is better than screenshot
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Private Data Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #17: TF001

Property	Value
Issue Code	TF001
Severity	LOW
Issue Type	Private Data Tool
Server	playwright
Tool Name	browser_tabs
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_tabs
Description: List, create, close, or select a browser tab.
Input Schema Type: object
Properties: 2 property/properties defined

Issue Type Information

Issue Type: Private Data Tool
Issue Code: TF001
Server: playwright
Severity: LOW

Issue #18: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_handle_dialog
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_handle_dialog
Description: Handle a dialog
Input Schema Type: object
Properties: 2 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #19: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_evaluate
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_evaluate
Description: Evaluate JavaScript expression on page or element
Input Schema Type: object
Properties: 3 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #20: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_file_upload
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_file_upload
Description: Upload one or multiple files
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #21: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_fill_form
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_fill_form
Description: Fill multiple form fields
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #22: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_press_key
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_press_key
Description: Press a key on the keyboard
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #23: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_type
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_type
Description: Type text into editable element
Input Schema Type: object
Properties: 5 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #24: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_navigate
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_navigate
Description: Navigate to a URL
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #25: TF001

Property	Value
Issue Code	TF001
Severity	HIGH
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_run_code
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_run_code
Description: Run Playwright code snippet
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: HIGH

Issue #26: TF001

Property	Value
Issue Code	TF001
Severity	LOW
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_click
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_click
Description: Perform click on a web page
Input Schema Type: object
Properties: 5 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: LOW

Issue #27: TF001

Property	Value
Issue Code	TF001
Severity	LOW
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_drag
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_drag
Description: Perform drag and drop between two elements
Input Schema Type: object
Properties: 4 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: LOW

Issue #28: TF001

Property	Value
Issue Code	TF001
Severity	LOW
Issue Type	Public Sink Tool
Server	playwright
Tool Name	browser_select_option
Issue Message	Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, ...

Full Issue Message

Data leak toxic flow detected. The same agent has access to at least one tool that produces untrusted content, one tool that can access private data, and one tool that can behave as a public sink. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF001

Tool Details

Tool Name: browser_select_option
Description: Select an option in a dropdown
Input Schema Type: object
Properties: 3 property/properties defined

Issue Type Information

Issue Type: Public Sink Tool
Issue Code: TF001
Server: playwright
Severity: LOW

Issue #29: TF002

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_snapshot
Description: Capture accessibility snapshot of the current page, this is better than screenshot
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF002
Server: playwright
Severity: HIGH

Issue #35: TF002

Property	Value
Issue Code	TF002
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_select_option
Issue Message	Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructi...

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_select_option
Description: Select an option in a dropdown
Input Schema Type: object
Properties: 3 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF002
Server: playwright
Severity: HIGH

Issue #36: TF002

Property	Value
Issue Code	TF002
Severity	HIGH
Issue Type	Untrusted Content Tool
Server	playwright
Tool Name	browser_tabs
Issue Message	Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructi...

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_tabs
Description: List, create, close, or select a browser tab.
Input Schema Type: object
Properties: 2 property/properties defined

Issue Type Information

Issue Type: Untrusted Content Tool
Issue Code: TF002
Server: playwright
Severity: HIGH

Issue #37: TF002

Property	Value
Issue Code	TF002
Severity	LOW
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_close

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_handle_dialog
Description: Handle a dialog
Input Schema Type: object
Properties: 2 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: HIGH

Issue #39: TF002

Property	Value
Issue Code	TF002
Severity	CRITICAL
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_evaluate
Issue Message	Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructi...

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_evaluate
Description: Evaluate JavaScript expression on page or element
Input Schema Type: object
Properties: 3 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: CRITICAL

Issue #40: TF002

Property	Value
Issue Code	TF002
Severity	CRITICAL
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_file_upload
Issue Message	Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructi...

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_file_upload
Description: Upload one or multiple files
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: CRITICAL

Issue #41: TF002

Property	Value
Issue Code	TF002
Severity	LOW
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_fill_form

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_fill_form
Description: Fill multiple form fields
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: LOW

Issue #42: TF002

Property	Value
Issue Code	TF002
Severity	LOW
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_install

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_navigate
Description: Navigate to a URL
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: LOW

Issue #46: TF002

Property	Value
Issue Code	TF002
Severity	CRITICAL
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_run_code

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_run_code
Description: Run Playwright code snippet
Input Schema Type: object
Properties: 1 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: CRITICAL

Issue #47: TF002

Property	Value
Issue Code	TF002
Severity	LOW
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_take_screenshot
Issue Message	Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructi...

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_take_screenshot
Description: Take a screenshot of the current page. You can't perform actions based on the screenshot, use browser_snapshot for actions.
Input Schema Type: object
Properties: 5 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: LOW

Issue #48: TF002

Property	Value
Issue Code	TF002
Severity	HIGH
Issue Type	Destructive Tool
Server	playwright
Tool Name	browser_click

Full Issue Message

Destructive toxic flow detected. The same agent has access to at least one tool that produces untrusted content and one tool that can behave destructively. For more information, see https://explorer.invariantlabs.ai/docs/mcp-scan/issue-code-reference/#TF002

Tool Details

Tool Name: browser_tabs
Description: List, create, close, or select a browser tab.
Input Schema Type: object
Properties: 2 property/properties defined

Issue Type Information

Issue Type: Destructive Tool
Issue Code: TF002
Server: playwright
Severity: LOW

Issue #52: W004

Property	Value
Issue Code	W004
Severity	UNKNOWN
Issue Type	Unknown
Server	howtocook-mcp
Tool Name	N/A
Issue Message	The MCP server is not in our registry.

Full Issue Message

The MCP server is not in our registry.

Issue Type Information

Issue Type: Unknown
Issue Code: W004
Server: howtocook-mcp
Severity: UNKNOWN
